## Controls assessment

## Current assets

Assets managed by the IT Department include:

- On-premises equipment for in-office business needs
- Employee equipment: end-user devices (desktops/laptops, smartphones), remote workstations, headsets, cables, keyboards, mice, docking stations, surveillance cameras, etc.
- Management of systems, software, and services: accounting, telecommunication, database, security, ecommerce, and inventory management
- Internet access
- Internal network
- Vendor access management
- Data center hosting services
- Data retention and storage
- Badge readers
- Legacy system maintenance: end-of-life systems that require human monitoring

| Administrative Controls |   |                              |          |  |  |
|-------------------------|---|------------------------------|----------|--|--|
| Control Name            | Control type and explanation  | Needs to be implemente d (X) | Priority |  |  |
| Least Privilege         | Preventative; reduces risk by making sure vendors and non-authorized staff only have access to the assets/data they need to do their jobs | X                            | High     |  |  |
| Disaster recovery plans | Corrective; business continuity to ensure systems are able to run in the event of an  | X                            | High     |  |  |

| Administrative Controls           |  |   |        |  |
|-----------------------------------|--|---|--------|--|
|                                   | incident/there is limited to no loss of productivity downtime/impact to system components, including: computer room environment (air conditioning, power supply, etc.); hardware (servers, employee equipment); connectivity (internal network, wireless); applications (email, electronic data); data and restoration |   |        |  |
| Password policies                 | Preventative; establish password strength rules to improve security/reduce likelihood of account compromise through brute force or dictionary attack techniques  | X | High   |  |
| Access control policies           | Preventative; increase confidentiality and integrity of data   | Х | High   |  |
| Account<br>management<br>policies | Preventative; reduce attack<br>surface and limit overall impact<br>from disgruntled/former<br>employees  | X | Medium |  |
| Separation of duties              | Preventative; ensure no one has<br>so much access that they can<br>abuse the system for personal<br>gain   | X | High   |  |

## **Technical Controls**

| Control Name   | Control type and explanation   | Needs to be implemented (X) | Priority   |
|--|--|-----------------------------|------------|
| Firewall   | Preventative; firewalls are<br>already in place to filter<br>unwanted/malicious traffic from<br>entering internal network            |                             | Maintained |
| Intrusion Detection<br>System (IDS)                    | Detective; allows IT team to identify possible intrusions (e.g., anomalous traffic) quickly  | Х                           | High       |
| Encryption   | Deterrent; makes confidential information/data more secure (e.g., website payment transactions)                                      | X                           | High       |
| Backups  | Corrective; supports ongoing productivity in the case of an event; aligns to the disaster recovery plan                              |                             | Maintained |
| Password<br>management<br>system                       | Corrective; password recovery, reset, lock out notifications   | Х                           | High       |
| Antivirus (AV)<br>software                             | Corrective; detect and quarantine known threats  | Х                           | Medium     |
| Manual monitoring,<br>maintenance, and<br>intervention | Preventative/corrective;<br>required for legacy systems to<br>identify and mitigate potential<br>threats, risks, and vulnerabilities | X                           | Medium     |

## **Physical Controls**

| Control Name   | Control type and explanation  | Needs to be implemented (X) | Priority |
|--|---|-----------------------------|----------|
| Time-controlled safe   | Deterrent; reduce attack<br>surface/impact of physical<br>threats   | X                           | Medium   |
| Adequate lighting  | Deterrent; limit "hiding" places to deter threats   | X                           | Low      |
| Closed-circuit<br>television (CCTV)<br>surveillance                | Preventative/detective; can reduce risk of certain events; can be used after event for investigation  | X                           | Medium   |
| Locking cabinets<br>(for network gear)                             | Preventative; increase integrity<br>by preventing unauthorized<br>personnel/individuals from<br>physically accessing/modifying<br>network infrastructure gear | X                           | High     |
| Signage indicating alarm service provider                          | Deterrent; makes the likelihood of a successful attack seem low   | Х                           | Low      |
| Locks  | Preventative; physical and digital assets are more secure   | X                           | High     |
| Fire detection and prevention (fire alarm, sprinkler system, etc.) | Detective/Preventative; detect<br>fire in the toy store's physical<br>location to prevent damage to<br>inventory, servers, etc.                               | Х                           | High     |
